- Built a kanban board from scratch for editors and producers to collaborate.
- Implemented a video collaboration feature with timestamp commenting and version management.
- Built a 3D collaboration prototype.
- Developed all the features for the web app and built APIs for select features

FREELANCE WORK

Prior to working full-time, I had about 3 years of experience working as a freelance developer. I have worked with multiple clients from India, the US, and Europe. To name some of the clients - Protofolio, Studiotale, Intry Careers, Veveo Health, Pulpcare, Apiria, and Vision studio.

ABOUT

I have over 4 years of hands-on experience in crafting applications and implementing features across both front-end and back-end technologies. Frequently, I am involved in the entire feature development lifecycle, from initial design to final implementation, enabling me to deliver optimal efficiency
